PRELIMINARY AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This is a response to the Office Action mailed on March 27, 2000, in which all of the pending claims were finally rejected. This Preliminary Amendment amends all of the pending claims to clarify the claimed process in a manner which avoids the prior art without altering the principal focus of the claims.

In the Claims:

D1
1. (Thrice Amended) A process of forming an integrated circuit, comprising:
growing a silicon dioxide field isolation region on a semiconductor wafer
without forming silicon nitride inclusions in said field isolation region exclusively by means
of a hydrogen-free oxidant at a pressure less than about 30 atm; and forming a gate oxide
without a prior sacrificial oxidation.

D2
5. (Thrice Amended) A field isolation region among integrated circuit devices on a
semiconductor substrate formed by a process comprising:
avoiding the formation of silicon nitride inclusions in the field isolation region by
exposing a field region of the semiconductor substrate to a hydrogen-free oxidizing ambient
at a pressure between about 5 atm and 30 atm.
